MOHAN BABU UNIVERSITY

Sample Academic Assignment

Subject: CAO

Student Name: _____
Student ID: _____
Submission Date: _____

Objective

Review core concepts in computer architecture and organization.

Tasks

1. Draw and label a block diagram of a basic computer system, including CPU, memory, input, and output.

2. Explain the roles of the ALU, control unit, and registers.

3. Describe the instruction cycle: fetch, decode, execute, and write-back.

4. Compare hardwired and microprogrammed control units in a table.

5. Explain cache memory and compare cache, RAM, and secondary storage.

6. Convert the decimal numbers 25, 45, and 100 to binary; show your working.

7. Explain pipelining and identify one possible hazard.

Submission

Submit a neatly formatted PDF or handwritten scan with diagrams and answers.

Note: This is a sample practice assignment created for website testing and learning. It is not an official university-issued assignment.
