Video Tutorials: Data Analysis Watch Guide

A watch guide and tutorial outline | Sample resource

Suggested tutorial topic

Exploratory Data Analysis (EDA) using Python and pandas.

Learning objectives

- Load a CSV file into a DataFrame.
- Inspect rows, columns, and data types.
- Check missing values and duplicates.
- Create a basic chart.
- Write two observations from the results.

Suggested sequence

- Introduction to pandas DataFrame.
- Reading CSV files.
- Summary statistics.
- Handling missing values.
- Visualizing a numerical column.

Note

This is a tutorial guide, not an actual video file. Add a faculty-approved video link or upload an MP4 to the Video Tutorials card.
